Pooled Procurement Mechanism Reference Pricing: ARVs

Version Q1 2026 – March 2026

This information will be updated periodically, with the latest made available here

The Global Fund has established Framework Agreements with manufacturers of antiretroviral medicines with the aim to achieve lower prices and also ensure the sustainable and reliable on-time supply of the full range of the needed ARVs.

The prices below are the prices at which the Global Fund Pooled Procurement Mechanism aims to deliver the health products at or below throughout the grant implementation period (2024-2026) as recommended in the Global Fund Guidelines for Grant Budgeting for health products: https://www.theglobalfund.org/media/3261/core_budgetinginglobalfundgrants_guideline_en.pdf

Actual prices achieved for a grant will depend on how early the orders are placed by Principal Recipients - and additionally the achievement of certain volume thresholds through the pooled volumes to enable us to achieve negotiated prices through the mechanism. Actual prices achieved will be charged to the grant.

Note that pricing for some items may not be available for some countries due to patent or licensing restrictions.

Some non-optimal products/formulations/pack-sizes have been removed from this version of the reference price list: pricing can be provided on request should the product still be commercially available.

1st line adult	Reference price (EXW, USD)					
	Pack of 30		Pack of 90		Pack of 180	
	per pack	Treatment per year	per pack	Treatment per year	per pack	Treatment per year
